

*Vibra*LITE can help with **BOATING:**

Even during recreation times such as boating, we need reminders to check engine rooms, start or stop our “watch”, take our medication, be reminded to stretch or change positions.

It is vital to check a yacht's engine room very regularly while under way. (raw-water pumps, all exhaust components, turbocharger) Remembering to do these checks as often as needed will not be problem with the help of the “VibraLITE” vibration alarm watch. Set the Auto Repeat Countdown Timer and vibrations on your wrist will remind you each and every time until you shut it off.

When crewing and doing your “watch”, the “VibraLITE” can be your “wake up call” without disturbing other sleeping crew.

High Noise Levels often make it impossible to hear an audible alarm. Using the “VibraLITE” vibration watch allows you to be alerted or reminded even when an audible alarm cannot be heard.

Set the Countdown Timer for the required amount of time (i.e. every hour to check the engine room or every 4 hours for your “watch” shift etc.) The Auto-Repeat Feature on the Countdown Timer on “VibraLITE 3” and “VibraLITE 8” will automatically reset and countdown for the preset time each time it reaches zero. These “interval” reminders are preset once and continue to repeat until you turn the countdown OFF with a push of a button. On “VibraLITE 8”, it counts each time the countdown reaches Zero, so you can know exactly how many times you have performed the task. The Countdown Timer on “VibraLITE 3” and on “VibraLITE 8” will provide you with a short one second reminder at 10 minutes and again at 5 minutes before zero. This little silent reminder is very often helpful. On “VibraLITE 8” you can set this reminder feature for the one second reminder at 10 minutes and again at 5 minutes before zero to ON or OFF as you prefer.

On “VibraLITE 3” you can preset 2 alarms for daily reminders for example Medication Times or Tasks). The alarm(s) will alert you each day at your preset times.

On “VibraLITE 8” you can preset up to 8 alarms for daily variable reminders. These alarms can be preset for any reminders during the day that you may need.

The hourly alert feature reminds you every hour on the hour. It is a short 1 second Vibration.

“VibraLITE 8” has 3 Time Zones that can be set. One can be set for current location, one for home location, and one for traveling to location or GMT. “VibraLITE 3” has two Time Zones that can be set.
